

Combi CE-10 Case Erector/Bottom Taper - Instant Productivity

The Combi CE-10 is an automatic system that erects and bottom seals corrugated cases at speeds from 500 to 700 cases per hour. This value-priced case erector is ideal for applications that require more throughput than manual case erecting can provide. This versatile system creates instant labor savings and increased production for a wide range of medium-speed applications. With industry-leading standard features like low-case and low-tape alarms, powered case magazine and fast no-tool changeovers, the CE-10 is a simple, operator-friendly solution for your packaging line.

STANDARD FEATURES

- High-capacity powered case magazine holds 150-200 cases
- Small footprint design minimizes floor space
- Standard low case & low tape alarms with stack light assure continuous operation
- Safety interlocked guarding restricts access to moving parts
- 2 inch 3M Accuglide™ 3 Tapehead
- 12 case per minute operation for medium speed packaging lines
- CE international certification

ADDITIONAL FEATURES:

- Heavy duty welded steel construction
- Right or left hand machine execution
- Allen Bradley PLC control
- Powered Case Magazine
- Low tape & low case alarm with stack light
- Heavy-duty vacuum pump
- Safety disconnect
- Three-year factory warranty*

CE-10 OPTIONS:

- Heavy-duty machine casters
- 3 inch 3M Accuglide™ 3 Tapehead

SPECIFICATIONS(MM)

Model	Case Size Min* (LxWxH)	Case Size Max (LxWxH)	Speed: CPM	Overall System Footprint
CE-10	8" x 6" x 5" (203x152x127mm)	17" x 13.5" x 17.5" (445x343x445mm)	12	5'8" x 7'6" 172x228 cm

The CE-10's hinged case hold down plate allows for easy tape-head removal. The case erector's open design eliminates overhead cross members providing easy access for planned maintenance.
