

ATS-MSX 420 - Heat Seal Technology

- Machine processes up to 33 products/min.
- Paper and film bands applicable
- Slim sealing plate for smallest products
- Films from 60 μ usable
- Band tension from 5 - 40 N

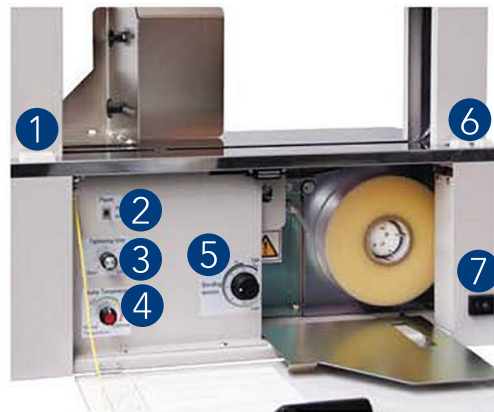

With the lightweight, space-saving ATS-MSX 420 paper and film bands can be processed using only one machine. Also thin film bands with a thickness from 60 μ can be used. Thanks to the pre-programmed functions "pause" and "soft" (for soft products) and "squeeze" (for increased band tension) this machine is very user friendly. With this mobile, inexpensive machine products get efficiently and gently banded.

The optional ATS-MS jumbo dispenser reduces the number of roll changes and enables comfortable working conditions thanks to its adjustable height.

- Change locations quickly thanks to brake rolls
- Type 1: Manual height adjustment
- Type 2: Adjustable height with crank handle

Convenient roll changing

The easy insertion and threading of the bandage is just another feature that enhances the high user-friendliness of the ATS-MSX

1. Manual start button
2. Function for soft products
3. Increasing of the band tension
4. Temperature setting
5. Infinitely adjustable band tension
6. Band feed / Automatic function
7. Service Mode
