

US-2000 - Ultrasonic Technology

- Easy, efficient and compact standard machine
- Wide range of different arch sizes
- High machine safety and easy accessibility
- Height adjustable and powerful performance
- With digital control unit DCP 2000

US-2000 AD 360 x 260 x 30 mm
US-2000 AD 14.17 x 10.24 x 1.18 inch

The US-2000 AD is a mobile, compact and automatic machine. The wide range of arch sizes allows an optimal adjustment to your product. To increase efficiency for our customers, we also offer special arch sizes on request, beside the standard arch line (see reverse side). The standard and adjustable fixed length mode or soft tension, enable tight and also gentle banding for soft products. The height adjustability and legroom also enable working from a seated position.

Clean processing and excellent accessibility eases handling and service.

The photocell is height adjustable and used for automatic release of the banding process.

Wide range of different arch sizes available.
